

INTERCONNECTED TRANSPORTATION HUBS

Transportation agencies and communities across the country are reshaping public transit and mobility systems to be more connected, sustainable and accessible, integrating multiple modes of transportation into one safe, seamless experience for travelers. Take a closer look at the key features and benefits that comprise an interconnected hub.

1. Real-time arrival/departure schedules
2. Digital payment stations
3. Pedestrian walkways
4. Bike/scooter access
5. Ridesharing services and shuttles
6. Carshare services
7. Electric vehicle charging stations
8. Safe, easy transfers between bus and rail services

Key Data

- **11.7 billion** more public transit passenger miles traveled between 1998 and 2018, a 26% increase
- Nearly **70%** of transit users walk to their stop or public transit station
- **87%** of trips on public transit directly benefit the local economy
- Investment in public transit can yield **50,000 jobs per \$1 billion invested** and offers a **5 to 1 economic return**
- **4.16 billion** gallons of gas are saved each year by using public transportation
- **36%** of Americans reported using ride-hailing services such as Uber or Lyft in 2018 (up from 15% in 2015)
- **343 million trips** have been taken on bike share and scooter share systems in the U.S. since 2010
